

OLKLIN – CIC-1

(CORROSION INHIBITOR)

INTRODUCTION:

OLKLIN-CIC-1 is a nitrates base cooling water treatment provides superior corrosion inhibitor to multi metal system, operating at high or low temperature. The product is recommended for internal combustion engines, water heating system, chilled water circuit and other closed system, containing ferrous and non-ferrous metals. Application of **OLKLIN – CIC-1** in engine – jacket cooling waters precludes the necessity for pre-softening or demineralising this water. Prevent deposits, scale, and sludge and resultant losses in heat transfer of mechanical efficiency caused by high-mineral water. It does not affect non-metal components.

Property	OLKLIN-CIC-1
State	Liquid
pH	13.5±0.2
Density @ 25 °C	1.31±0.02 @ 25°C
Color	Red
Odor	Almost odorless
Solubility in Water	Water soluble

*Properties mentioned and color shown in the photo above is for general idea of the product.

ADVANTAGE: OLKLIN-CIC-1

- ✓ Prevents scale and sludge
- ✓ Compatible with anti freeze solution
- ✓ No chromates
- ✓ Inhibits multi-metal systems

SPECIAL ADVANTAGES:

OLKLIN-CIC-1 saves electricity, ensures lower cooling time, increases production, reduces production cost, and increases cooling capacity of condensers & other equipments. It maintains head pressure for optimum cooling, provides excellent protection to steel, copper, brass, aluminium etc and increases life of equipments.

USAGE METHOD:

OLKLIN-CIC-1 may be added directly, as received, to the engine –cooling system. For chilled and hot-water systems, **OLKLIN-CIC-1** may be added directly to close circulating water from the drum, with a by pass feeder or any convenient means.

SAFETY AND HANDLING:

OLKLIN-CIC-1 is almost non-hazardous. Keep the container closed when not in use. The product should not be swallowed and prolonged contact with skin should be avoided. Should it come in contact with the eyes, flush with clean & cold water and get medical attention.

PACKING:

OLKLIN-CIC-1 is available in 50Kg carboy or as per requirements.
