

# OLKLIN – CICS

## (CORROSION INHIBITOR)

### INTRODUCTION:

**OLKLIN-CICS** is a corrosion inhibitor meant for the waters containing chlorides and sulphates. The product reduces corrosion effects of such water on metallic materials, in particular steel and brass. The product is recommended for the water (containing chloride and sulphate like corrosive elements) used in various application, like swimming pools (bathing water), washing of tanks and vessels etc, to prevent corrosion by such elements.

A significant technical advantage of OLKLIN-CICS (CORROSION INHIBITOR) is its efficiency in the virtually neutral pH range between 7 and 8, in particular from 7.2 to 7.6.

Another advantage of the product compared with other available inhibitors in the market is that very small amounts of corrosion inhibitor are sufficient to lead to effective minimization of the corrosion phenomena on steel, structural steel and brass. Owing to the very small amounts used, corrosion protection can be achieved with very small financial resources.

Property	OLKLIN-CICS
State	Liquid
pH	2.0 to 3.0
Density @ 25 °C	1.12±0.02 @ 25°C
Color	Blue
Odor	Odorless
Solubility in Water	Water soluble

\*Properties mentioned and color shown in the photo above is for general idea of the product. Actual product property may vary. Colorless product is also available.

### ADVANTAGE: OLKLIN-CICS

- ✓ Pre-softening of water is, generally, not required
- ✓ Prevents scale and sludge
- ✓ No chromates
- ✓ Inhibits multi-metal systems
- ✓ Increases life of equipments
- ✓ Does not affect non-metals

### USAGE METHOD:

**OLKLIN-CICS** may be added directly, as received, to the medium (water) from 0.01 to 0.5%. It also can be added directly from the drum with a by pass feeder or any convenient means.

### SAFETY AND HANDLING:

**OLKLIN-CICS** is non-hazardous. Keep the container closed when not in use. Should it come in contact with the eyes, flush with clean & cold water and get medical attention if required. MSDS of the product is available on request.

### PACKING:

**OLKLIN-CICS** is available in 50Kg Carboy or as per requirements.
